

DOOR SWING CHART

INSIDE

OUTSIDE

(EXIT)

NOTE: The handing of a door is always determined from the outside of the opening or from the side to which people would normally travel in order to exit a space. Many hardware suppliers refer to the swing of a door by indicating on which side the door is hinged or pivots. Swing designations for all glass doors should be given by swing number. The above chart will help you in determining the swing number of the door(s) you require.
